

**Second MaPhySto Conference on  
Lévy Processes - Theory and Applications  
January 21-25, 2002  
University of Aarhus**

This Conference is a sequel to the international conference, with the same title, organized by MaPhySto 7-22 January 1999. As a result of the interest engendered by the first conference, it was decided to have Lévy processes as an ongoing thematic topic for MaPhySto activities, for several years. Information on past such activities can be found at the MaPhySto website. See moreover the recently published volume, from Birkhäuser, having also the title *Lévy Processes. Theory and Applications* (Editors: O.E. Barndorff-Nielsen, T. Mikosch and S. Resnick).

**The organizing Committee** for this Second Conference consists of Thomas Mikosch, Elisa Nicolato, Goran Peskir, Ken-Iti Sato, and Ole E. Barndorff-Nielsen.

**Preliminary List of Invited Speakers:**
